WHO WE ARE

A Kenyan coffee partner built for international buyers.

VonSchelling Limited is a Nairobi-based agricultural export company. We connect Kenyan coffee with importers, roasters and distributors through responsible sourcing, disciplined quality evaluation, clear records and dependable export coordination. Coffee is our flagship operation.

01
Green Coffee Beans

Washed Kenyan Arabica in AA, AB, PB and C grades, plus specialty micro-lots.

02
Mizizi Coffee

Our Kenyan coffee brand for retail, hospitality and distribution.

03
Private Label

Coffee selection, roast profiles and packaging under your brand.

6	AA · AB · PB · C	10% to 11%	2

WHERE OUR COFFEE GROWS

Six counties. One highland character.

Volcanic soils, cool nights and origins roughly 1,300 to 2,300 metres above sea level. We cup each lot and send you the sample and notes before you commit.

1,600 TO 2,300 M

Nyeri

Mount Kenya and Aberdare slopes. Intense, complex cups with blackcurrant brightness and winey acidity.

1,400 TO 1,900 M

Kirinyaga

Southern Mount Kenya. Bright, sweet and layered cups with pronounced fruit.

1,350 TO 1,950 M

Murang'a

East of the Aberdares. Juicy, balanced coffees with vibrant acidity.

1,500 TO 2,200 M

Kiambu

One of Kenya's oldest districts. Full-bodied, well-structured lots.

1,300 TO 1,900 M

Embu

Eastern Mount Kenya. Floral, delicate cups with sweet citrus notes.

1,300 TO 1,950 M

Meru

A rising specialty origin. Bold, fruity coffees with excellent depth.

Varieties: SL28, SL34, Ruiru 11 and Batian. Sourced through direct estate and cooperative channels and the Nairobi Coffee Exchange (NCE) auction, especially for volume.

WASHED PROCESSING

Washed for clarity. Dried with care.

Kenya's washed process is the foundation of its bright, clean cup. We share the mill's processing details with every lot offer.

01
Selective picking

Ripe cherries delivered to the factory and hand sorted.

02
Pulp & ferment

Skin removed; mucilage broken down to temperature and ripeness.

03
Wash & grade

Washed in channels where denser parchment is separated.

04
Dry & stabilise

Turned on raised beds to our 10% to 11% moisture target.

Fermentation and drying follow the conditions of each mill and season. Mill records are available with the lot on request.

Raised drying beds, Fairview Estate, Kiambu. Daniel Case, CC BY-SA 4.0.

Graded by size. Approved by the cup.

After hulling, Kenyan coffee is graded by bean size, shape and density, then hand and machine sorted for defects. We match screen distribution and cup profile to your requirement.

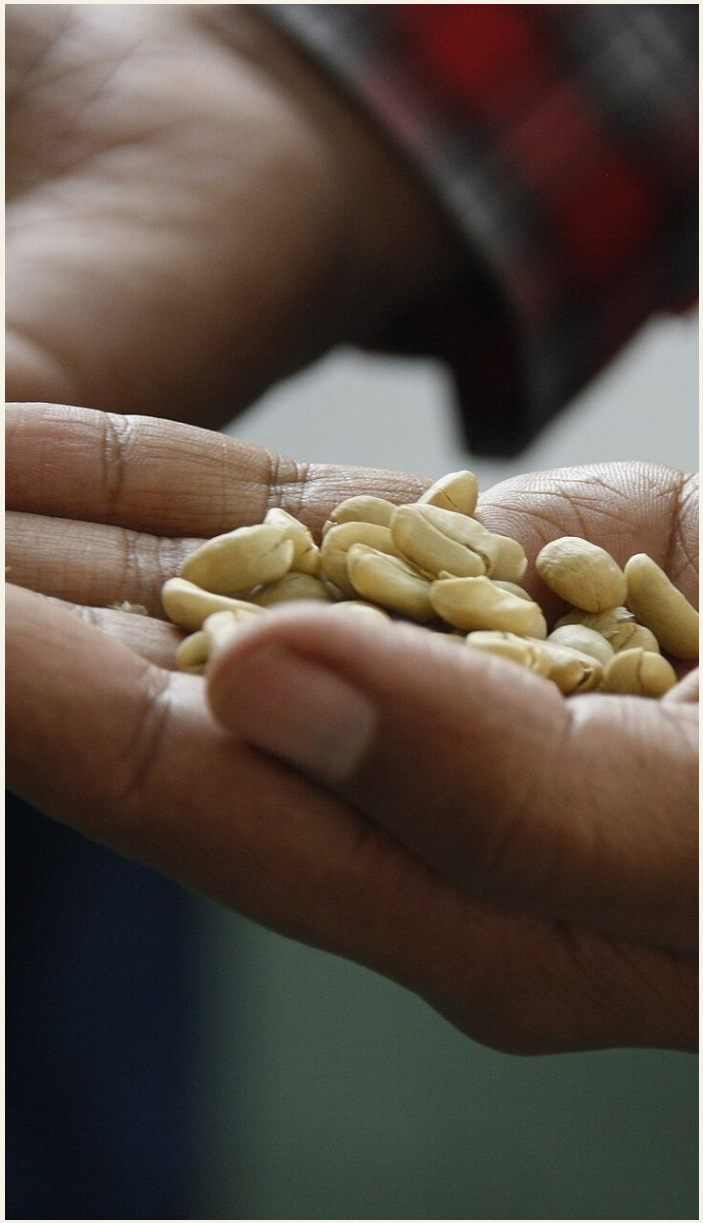

AA · Screens 17/18	Large flat beans. Kenya's top-size grade for bright, intense cups.
AB · Screens 15/16	Medium flat beans. Strong cup character and dependable value.
PB · Peaberry	Rounded single beans separated by shape on round-hole screens.
C · Screens 14/15	Smaller flat beans, well suited to blending.
Micro-lots	Single estate and cooperative factory lots with cup score, evaluator and sample date.

87+
Specialty micro-lots

84 to 86.5
Specialty AA and AB

82 to 84
High-commercial AB and C

Indicative SCA cup quality tiers. Each lot offer states its own score, evaluator and sample date.

Green Coffee Beans in hand. DFID, CC BY 2.0.

The coffee you approve is the coffee you receive.

We follow the international green coffee sample protocol. Each stage is documented so your buying team can trace every decision back to a sample.

01

Offer sample

300g or 500g drawn from the offered lot, sent with grade, origin and cup notes. You cup it and select the coffee.

02

Pre-shipment sample

Drawn from the milled, bagged lot before loading. Your written approval releases shipment.

03

Arrival sample

Checked at destination against the approved pre-shipment sample, closing the quality loop.

EVERY LOT OFFER STATES

Origin & lot	Origin, supplier or lot reference and crop details
Grade	Confirmed grade, screen and preparation
Cup quality	Cupping report or score with the named evaluator and sample date
Testing	Moisture, water activity and residue results with laboratory, method and date when required

EXPORT LOGISTICS

From Mombasa to your roastery.

Two export channels let importers and roasters of every size buy Kenyan coffee on terms that suit them.

CHANNEL 01 · DIRECT EXPORT

Full containers from Mombasa

For importers, trade houses and larger roasters running container programmes.

Terms	FOB Mombasa as standard; CFR or CIF to your named port
20 ft FCL	320 to 330 bags at 60 kg: 19.2 to 19.8 tonnes, indicative
Protection	Hermetic GrainPro or Ecotact liners and container desiccants can be specified
Contract	Lot, packing list, Incoterm and shipment window in writing

CHANNEL 02 · ROASTERY DIRECT VIA ALGRANO

Europe & North America, to your door

Through our partnership with Algrano, roasters buy our Kenyan lots in smaller volumes.

Who	Specialty and independent roasters in Europe and North America
Volume	Smaller volumes than a full container
Delivery	Import handled; coffee delivered to your warehouse or chosen address
Lots	Same Kenyan grades, samples and lot information

01 Enquiry
02 Quotation
03 Samples
04 Contract
05 Preparation
06 Freight
07 Delivery

Payment terms, Incoterm, named place and shipment window are agreed in the contract for each order.

CHAPTER 02 · FINISHED & BRANDED COFFEE

Mizizi Coffee

Exceptional coffee from the heart of Kenya.

Our special blend. 100% Arabica, roasted and packaged for retail, hospitality and distribution partners.

Roasts	Light · Medium · Dark
Formats	Whole bean · Ground
Sizes	250g · 500g · 1kg
Packaging	500g and 1kg high-barrier, nitrogen-flushed valve bags; 20 bags per master carton

Roasted beans in the cooling tray. Jkafader, CC BY-SA 3.0.

PRIVATE-LABEL COFFEE

Your brand. Kenyan coffee.

Coffee selection, roast profile development, whole-bean or ground formats, pack sizes, label coordination and production planning for your market.

MINIMUM ORDER QUANTITY

1,000 kg per roast profile

Verify the authority. Verify the document.

Coffee licensing	Current licence, issuer, validity and activity scope, with the roles of AFA Coffee Directorate and the Coffee Board of Kenya confirmed for the transaction
ICO origin records	International Coffee Organization Certificate of Origin where applicable. An origin record, not a quality certificate
KEPHIS plant health	Destination-specific phytosanitary requirements and the applicable KEPHIS certificate
Trade origin	Required origin documentation and competent issuer, with preferential origin assessed separately
Lab results	Moisture, water activity and residue tests with laboratory, method and date when required

EU BUYER DUE DILIGENCE · EUDR

01

Locate production

Plot geolocation, production dates and the chain linking plots to the offered coffee.

02

Review the evidence

Records assessed against the 31 December 2020 cut-off and production-country law.

03

Agree responsibilities

The EU operator's due diligence statement obligations confirmed before an order.

Supporting records are prepared lot by lot and shared early. Auction lot identity alone does not establish farm-level evidence.

YOUR NEXT COFFEE ORDER

Start with the right conversation.

Tell us the grade, volume and destination. We reply with matching lots, sample options and commercial terms, and confirm every specification in writing.

Samples	AA, AB, PB, C or a micro-lot, at 300g or 500g
Quotation	FOB Mombasa, CFR or CIF; or roastery-direct via Algrano
Documents	Lot specification, cupping report, export records and EUDR evidence where relevant
Mizizi & label	Roast, format, pack size, channel and volume
